UCLA B.S. Computer Science, University of California Los Angeles *Class of 2022*

Work Experience

APPLE, INC. *June 2019 - September 2019*

Software Engineering Intern working on Final Cut Pro X.

Made updates and added features to widely used Filter HUD and List View in Events panel using Objective-C and AppKit.

SIKE INSIGHTS *March 2019 - Present*

Led front-end development and design efforts for Sike Insights, an enterprise software company combining machine learning and psychology to help businesses understand human behavior.

Utilized design and business thinking to define the brand, to create and execute a roadmap, and to build out the entire front end of the onboarding implementation of our technology on tight deadlines to move forward with pilot companies.

MINDSPARK SUMMER *December 2016 - October 2018*

Founder & Chief Executive of Mindspark Summer, a two-week summer camp for kids with courses in web development, Java, and business/data analytics, singlehandedly generating \$50,000+ in revenue in two summers.

Responsibilities include defining vision and business plan, hiring/training staff, forming strategic partnerships, growing brand among target markets, running camp operations, designing 300+ page curriculum, and building online platform from scratch.

TUTORFLY *August 2017 - September 2018*

Software Engineering & Business Development Intern at Tutorfly, a peer-to-peer tutoring startup.

Developed and contributed to platform and landing page with React and Meteor; led initiatives in the Bay Area and Los Angeles, forming partnerships with local schools, to provide courses attracting 50+ students; designed marketing materials.

Projects & Extracurriculars

LA HACKS ORGANIZING TEAM *October 2018 - Present*

Design team member contributing to defining LA Hacks brand, vision, and visuals for the hackathon housing 1,000+ attendees and 3,500+ applicants annually.

Previously marketing team; grew social media presence, created marketing plan, and analyzed data from previous years.

QUICKEY *September 2018 - March 2019*

Front-end developer for productivity app boasting over 500,000+ shortcuts launched and 2,100+ weekly active users.

Collaborated with design, back-end, and marketing to add highly requested premium features including new tab workspaces, better backgrounds, etc. using React and Redux.

SURREALITY IOS *June 2016 - August 2016*

Built iOS puzzle game in Swift and SpriteKit featuring 200 levels, gorgeous custom graphics, and smooth gameplay. Boasts 250+ downloads on the app store.
